

crack watch dogs sin uplay launcher This was easily the most frustrating scam I have ever encountered. I didn't want to believe it at first, but after having my account hacked multiple times, I now know for sure that these companies are out to steal your money. It happened again today when someone tried to charge for "rainbow hair" in my Uplay store. After trying many things on the internet and asking around, I finally decided that there is no other option than banning the game via the crackwatchdogs.com site and replacing all of my game files with a single line of code that will override any purchases made by malicious software. Here is what you need to do: First, sign out of your account from the Ubisoft, Steam, and Uplay sites. Once signed out, go to crackwatchdogs.com and look for a little red "X" on the top left hand corner of the screen. Click on that and then enter any bogus email address that you don't mind getting spam from. That is going to be your "ID number" for this process. Then click on the huge red button that says "DISABLE MY ACCOUNT" ... trust me, it will be worth it. Next, make sure that the service is disabled by using this link: <https://support.ubi.com/en-US/Faq/000023120/How-to-I-disable-my-account> Next, go to the "create an account" screen on Uplay and enter your bogus email address that you just made up. Then create your password, user name, birthdate, etc. It doesn't matter what you enter here because this account will be only used to play the game offline once we are done disarming it. Then click on the big red button that says "CREATE ACCOUNT". Lastly go back to the crackwatchdogs.com and click on the same little red "X" and then enter your password that you just created for your Uplay account. Then click on the big green button that says "LOGIN TO UPLAY" Once you get there, go to "My Account" and scroll down until you get to the final part of this tutorial. Step 8: Download and install Uplay Repair (<http://uplayrepair.com/>) and then download the file that matches your system version. Step 9: This is really important!! Open Uplay Repair, click on Advanced Mode and then select "show all hidden files". After that, click on Repair Uplay Games (the first option) and wait until the process is 100% complete.
